Fig. 3

Figure 1 consists of two views of a segmented strip assembly. View (a) is a perspective view showing a curved strip with eight segments labeled 31. The segments are connected by joints labeled 33a. The ends of the strip are labeled 33b. The strip is shown in a curved configuration with a radius of curvature  $R$  and a central angle of  $195^\circ$ . The segments are separated by a distance  $P$ , and the joints are separated by a distance  $4$ . The strip is shown in a curved configuration with a radius of curvature  $R$  and a central angle of  $195^\circ$ . The segments are separated by a distance  $P$ , and the joints are separated by a distance  $4$ . View (b) is a plan view of the strip, showing its overall length of 151. The segments are labeled 31, and the joints are labeled 33a. The strip is shown in a straight configuration.
